**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Johannes (NL 9101758).

Referring to Claim 1, Johannes teaches a vehicle, comprising:

A tag, said tag being mounted in the vehicle, the tag including a recording medium in which identification information for identifying the vehicle is registered (see first 2 lines of ABSTRACT);

Wherein the tag is attached inside a resin member of the vehicle (see lines 2-7 of ABSTRACT).

Referring to Claim 9, Johannes teaches a vehicle, comprising:

A vehicle body (see ABSTRACT noting that a bicycle has a vehicle body);

A resin member attached to said vehicle body (see lines 2-7 of ABSTRACT); and

A tag attached inside said resin member, said tag including a recording medium in which identification information for identifying the vehicle is registered (see first 2 lines of ABSTRACT).

Referring to Claim 17, Johannes teaches a resin member for a vehicle, comprising:

A tag, said tag attached inside the resin member (see lines 2-7 of ABSTRACT), said tag including a recording medium in which identification information for identifying the vehicle is registered (see first 2 lines of ABSTRACT).

Referring to Claims 2, 10, and 18, Johannes also teaches the tag attached inside a vehicle seat composed of a resin member (see figs. 1 and 2 noting that the frame can be the frame of a bicycle seat).

Referring to Claims 3, 4, 11, and 12, Johannes also teaches a saddle-type vehicle (see ABSTRACT noting that a bicycle is a saddle-type vehicle).

Referring to Claims 5, 6, 13, 14, and 19, Johannes also teaches the tag located adjacent to a front or rear of the seat, so that a distance between the tag and an outside of the seat is small (see figs. 1 and 2 noting that the frame 7 can be the pole under the bicycle seat thus putting the tag near the seat).

Referring to Claims 7, 8, 15, 16, 20, and 21, Johannes also teaches an RFID tag including an IC and means for transmitting/receiving radio signal embedded therein (see last 5 lines of ABSTRACT).
